## Our **Story**

Aqualung, part of the Aqualung Group, is the leading global designer and manufacturer of dive and water sports gear.

Now available in more than 100 countries around the world, Aqualung pioneered the creation of modern diving equipment when Captain Jacques-Yves Cousteau teamed with engineer Emile Gagnan in 1943 to develop the first "aqua-lung," making underwater exploration possible.

Aqualung is committed to providing sustainable, innovative, reliable, and easy-to-use products that allow adventure seekers to enjoy responsible water exploration and continues to set the industry standard for water sports equipment in technology, comfort, safety and design.

#### Our World

At Aqualung we believe that underwater exploration is an unexpected journey from which you can't come back unchanged. A journey where the unbelievable becomes believable, where emotions and sensations are multiplied. An unexpected journey that enriches each of us. That is why we keep on questioning the status quo, daring to think differently so we can offer every explorer the safest and most advanced water gear for their quest. At Aqualung we provide the most advanced water gear enabling anyone to reconnect with oceans and go beyond the expected.

# Regulators®

# 15

Aqualung is synonymous with the scuba regulator we invented it. So, it stands to reason that we continue to lead the way with the best underwater breathing devices available today.

An Aqualung scuba regulator offers you the best in comfort, value, ease of breathing, control and peak performance.

When the first stage is not connected to a cylinder valve, the Auto Closure Device (ACD) keeps the inlet shut to protect the first stage internal parts from contamination and corrosive water.

- · Preserves the internal lubrication
- · Keeps the inlet filter clean and dry
- Available Din 300b Yoke 232b
- Patented system US20060157123

# **High-pressure seat**

Yoke regulator connected

> open regulator

#### 20 years of reliability

Yoke regulator off line

> regulator closed

The high-pressure seat is the "heart" of a regulator. With every breath a diver takes, the high-pressure valve opens and closes again. The seat must create the perfect seal every time, providing consistent accuracy of the medium working pressure.

It is crucial to select the perfect blend of materials in order to achieve reliability over the years of regulator usage. Thanks to proprietary materials and a specific overmolding adhesion processs, Aqualung's unique, patented seat design has proven to be a benchmark regardless of the often extreme conditions their regulators are used in.

Each balanced high pressure seat is 300 bar compatible and was individually inspected multiple times at Aqualung's facility in Carros, France, to guarantee the highest manufacturing quality levels.

For the past 20 years, this valve has been installed into over one million regulators and it has proven to be exceptionally reliable.

WOB (Work Of Breathing)

# LEGBND

Since 2002, the **Aqualung Legend regulators** have been synonymous with unparalleled **breathing comfort**. For the third generation, our engineers went above and beyond designing these **state-of-the-art Leg3nd** diving regulators. They **simplified** the line-up with a single first stage compatible with all three versions of the second stage and any underwater condition.

Passionate divers can choose their second stage from three models, depending on how much they want to customize their airflow underwater. From **tropical to icy cold water**, from **shallow reefs to deep shipwrecks**, from **calm seas to strong currents**, the **Aqualung Leg3nd regulator** is the perfect option for any **dive adventure**.

#### 1st STAGE

- Auto Closure Device (ACD) keeps the inlet shut to protect the first stage internal parts from contamination and corrosive water when the first stage is not connected to a cylinder valve
- Exceptional cold-water performance is achieved by modernizing Aqualung's three anti-freeze properties:
- 1. Integrated dry chamber keeps inner dry by isolating them from the outside environment
- 2. Deep ribs create a large heat exchange surface to prevent ice forming on the mechanism (+30% vs Glacia / +70% vs Legend 2)
- 3. The new overmolded cap delays ice forming over the external diaphragm
- Auto-Balanced (also known as Over-Balanced) While most modern regulators can compensate tank air pressure drops, they can't balance the variations of the ambient hydrostatic pressure as you descend deeper. The Aqualung Leg3nd's first stage overcompensates the interstage pressure to lower the breathing effort.
- Ergonomically shaped DIN and YOKE screws made of a bi-material "Soft Grip" surface. Provide a better hold when installing or removing the first stage especially with cold hands

#### 2<sup>nd</sup> STAGE

- $\boldsymbol{\cdot}$  New front cover opening channels allow water to flow sideways over the Diaphragm
- Radial openings to prevent freeflows when diving in stronger currents
- $\boldsymbol{\cdot}$  Openings widened to reduce peak inspiratory flow by an impressive 20%
- Overmolded exhaust cover made of elastomer with a "soft touch" effect
- Overmolded air purge. Wide surface area makes regulator purging easier Purge depth controller optimizes air flow with minimal effort
- Patented Comfobite mouthpiece reduces jaw fatigue and secures the second stage more comfortably
- Detachable and reusable mouthpiece clamp allows a quick and simple toolfree mouthpiece change without plastic waste
- The enlarged heat exchanger helps to prevent freezing of the second stage mechanism
- · Air channel deflector
- $\boldsymbol{\cdot}$  Directs the air flow evenly during the inhalation phase
- · Streamlined bi-material deflector lowers the exhalation effort
- Flexible and lightweight (just 132g) Aqua Flex hose with dual protectors

LEG3ND ELITE DIN RG148005
LEG3ND ELITE YOKE RG148004
PK LEG3ND ELITE YOKE + OCTO + SPG + BAG RC124112
PK LEG3ND ELITE DIN + OCTO + SPG + BAG RC124113

The **Leg3nd Elite** gives divers unprecedented capabilities by providing perfect precision and enhanced ergonomics at your fingertips. Advanced divers appreciate the independent micro adjustments to fine-tune their own individual breathing preferences.

#### **Technical Features**

- Auto-Balanced (also known as Over-Balanced): While most modern regulators can compensate tank air pressure drops as you scuba dive, they can't balance the variations of the ambient hydrostatic pressure as you descend deeper.
- Integrated dry chamber keeps inner components clean and dry by isolating them from the outside environment
- Deep ribs create a large heat exchange surface area that helps to prevent ice forming on the mechanism
- Inhalation adjustment knob: Allows the diver to precisely adjust the opening effort sensitivity.
- Overmolded with "soft touch" elastomer, the ergonomically designed switch perfectly controls the venturi effect, either allowing or containing a natural freeflow.

#### **LEG3ND MBS**

 LEG3ND MBS YOKE
 RG148002

 LEG3ND MBS DIN
 RG148003

 PK LEG3ND MBS YOKE + OCTO
 RQ132113

 PK LEG3ND MBS DIN + OCTO
 RQ132114

The **Leg3nd MBS** allows divers with the simple turn of a knob to adjust two essential parameters. This revolutionary combination makes possible the adjustment of Venturi effect and inhalation effort simply and simultaneously. The diver quickly and easily adapts regulator's performance to its breathing preferences.

- Auto-Balanced (also known as Over-Balanced): While most modern regulators can compensate tank air pressure drops as you scuba dive, they can't balance the variations of the ambient hydrostatic pressure as you descend deeper.
- Integrated dry chamber keeps inner components clean and dry by isolating them from the outside environment
- Deep ribs create a large heat exchange surface area that helps to prevent ice forming on the mechanism
- With the MBS on minimum position (only one full rotation): The spring is fully compressed and the inhalation effort is about 3 mbar higher. A free flow is contained when the venturi blade restricts the injection outlet.
- With the MBS on maximum position, injection of the airstream is unrestricted and the flow is maximized.

 LEG3ND YOKE
 RG148000

 LEG3ND DIN
 RG148001

 PK LEG3ND YOKE + OCTO
 RQ132115

 PK LEG3ND DIN + OCTO
 RQ132116

The **Leg3nd** offers performance and simplicity. A simple venturi flap with an ergonomic design and a «soft touch» elastomer allows a simple and quick way to contain or allow a continuous flow and ensure perfect control without ever sacrificing ventilatory comfort.

# LEGEND AQUALUNG

#### **Technical Features**

- Auto-Balanced (also known as Over-Balanced): While most modern regulators can compensate tank air pressure drops as you scuba dive, they can't balance the variations of the ambient hydrostatic pressure as you descend deeper
- Integrated dry chamber keeps inner components clean and dry by isolating them from the outside environment
- Deep ribs create a large heat exchange surface area that helps to prevent ice forming on the mechanism
- Overmolded with "soft touch" elastomer, the ergonomically designed switch perfectly controls the venturi effect, either allowing or containing a natural freeflow."

LEG3ND PARTNER YOKE RG148006 LEG3ND PARTNER DIN RG148007

A **Leg3nd Partner** version is a first stage with an Octopus, each with aunique serial number, an excellent choice for an alternative air source. The 1m long bright yellow hose on the second stage allows for easy buddy sharing andvisibility during dives. This regulator is cold water CE approved.

- Auto-Balanced (also known as Over-Balanced): While most modern regulators can compensate tank air pressure drops as you scuba dive, they can't balance the variations of the ambient hydrostatic pressure as you descend deeper.
- Integrated dry chamber keeps inner components clean and dry by isolating them from the outside environment
- Deep ribs create a large heat exchange surface area that helps to prevent ice forming on the mechanism
- Overmolded with "soft touch" elastomer, the ergonomically designed switch perfectly controls the venturi effect, either allowing or containing a natural freeflow."

 RG125111

 MIKRON ACD DIN
 RG125112

 MIKRON ACD YOKE + OCTO
 RQ124111

 MIKRON ACD DIN + OCTO
 RQ124112

The **Mikron** is the smallest and lightest regulator in the Aqualung collection. Specifically designed for traveling divers who prefer to bring their own equipment on their diving adventures, it packs great performance into a compact package.

Equipped with our patented auto-closure device (ACD) and Comfo-Bite™ mouthpiece, plus a pneumatically-balanced second stage, you're all set for a smooth, easy breathing experience for your next globe-trotting adventure.

- Reduced size and weight makes the Mikron the ideal choice for travelers
- "T" shape body for streamlined hose positioning
- Pneumatically-balanced second stage allows for smooth, easy breathing
- The second stage has an adjustment knob that allows the diver to optimize the opening effort

CALYPSO PARTNER - NITROX M26X2 RG126117

#### **CALYPSO**

The **Calypso** is always emulated but never equaled. It is compact, lightweight, easy to clean, pack, and maintain. It is durable and dependable in even the most demanding conditions, the perfect tool for dive centers.

#### **CALYPSO PARTNER**

A version of the **Calypso**delivered with a 1m long yellow hose and the **Calypso Octopus** 2nd stage. This regulator is cold water CE approved.

- The large-diameter piston gives you more stable pressure out
- Designed with large holes in end caps for easy cleaning and better thermal exchange and improved resistance to freezing
- Includes a second filter, which can be changed without dismantling and provides increased protection from polluted air
- In-line ergonomic Venturi knob allows for precise adjustments, even while wearing gloves

**CALYPSO OCTOPUS** 

RS137111

Compliment your **Calypso** and **Titan** regulators with this reliable, easy breathing octopus.

#### **Technical Features**

- Mid-size, high performance octopus to compliment the Titan and Calypso regulators
- High visibility 39" yellow hose and high visibility yellow cover makes it easy to locate in an emergency
- The venturi lever prevents unwanted freeflow when not in use
- · Easy purge front cover
- Not recommended for overbalanced regulators of the Legend series.

LEG3ND OCTOPUS

RS119005

The **Leg3nd Octopus** provides the same great performance as the **Leg3nd** primary second stage.

- The LEG3ND octopus is pneumaticallybalanced resulting in smooth and easy breathing
- A heat exchanger (patented) which surrounds the valve mechanism, dissipates the cold caused by gas expansion while drawing in the warmth of the ambient water
- The easy-to-grip venturi lever prevents unwanted freeflow at the surface while giving a performance boost at depth
- Includes 1m yellow hose and yellow front cover making it easy to locate in an emergency.

HELIX OCTOPUS RS144001 HELIX PACK 4 OCTOPUS RS144002

The **Helix Pro octopus** provides the same great performance as the Helix Pro primary second stage.

#### **Technical Features**

- The Helix octopus is pneumaticallybalanced resulting in smooth and easy breathing
- A heat exchanger (patented) which surrounds the valve mechanism, dissipates the cold caused by gas expansion while drawing in the warmth of the ambient water
- The easy-to-grip venturi lever prevents unwanted freeflow at the surface while giving a performance boost at depth
- Includes 1m yellow hose and yellow front cover making it easy to locate in an emergency

# **Mikron Octopus**

MIKRON OCTOPUS

RS125111

Whether you own a **Mikron** regulator or not, this travel friendly octopus is the one you want to take on your next dive trip.

- Pneumatically-balanced octopus is ideally suited for over-balanced first stages
- An inhalation effort adjustment knob allows you to desensitize the unit while it's stowed for the dive preventing unwanted freeflow
- High visibility 39" braided, yellow hose and high visibility yellow cover makes it easy to locate in an emergency."

#### **Z Valve**

Simple one outlet valve. Can be used in yoke configuration up to 232 bars or DIN to 200 bars. Manufactured from quality brass which meets the very strict NFA51105 standard than warranties a very low level of impurties. It received a multi-coat plating with a final coat of chrome. Thanks to an insert it can easily converted from yoke (INT) to DIN connection.

#### **Tag Valve**

Two outlet valve. Can be used in yoke configuration up to 232 bars or DIN to 200 bars. Manufactured from quality brass which meets the very strict NFA51105 standard than warranties a very low level of impurties. It received a multi-coat plating with a final coat of chrome. Thanks to an insert it can easily converted from yoke (INT) to DIN connection.

# BC Se

# 18

Through decades of design innovations and technological leadership, Aqualung has perfected a diverse line of buoyancy compensation products that exceed the needs and expectations for all levels of divers.

Aqualung has perfected BCD design styles for jackets, back- and hybrid inflation for recreational and professional scuba divers alike.

# Modlock™ System

Aqualung's patent-pending Modlock™ connectors revolutionize the way we look at BCDs. Thanks to a round clipping design and 27 sizes configurations, the Modlock™ allows you to fully customize you BC for the perfect fit and needed accessories. Beyond picking our base components such as the back pad, the waistbands, and the shoulders straps available in 3

sizes, you can add up a range of optional accessories such as different sized trim pockets or an SMB holder.
Unlock each component in a matter of seconds to reduce yourse for transportation

matter of seconds to reduce volume for transportation or adapt your configuration before going diving. You won't need a special tool to do it, a simple pen or key works.

# Wrapture™ Harness System

The cylinder is in perfectly vertical position

There are several key elements that make up the Wrapture™ Harness System:

- · A specialized Backplate
- Tank band (location)

The valve retention strap pulls the cylinder on the upper part

A specialized thin Backplate which keeps the cylinder close to the diver's gravity

- Valve retention strap
- LDPE support (low density polyethylene)
- Swivel shoulder buckles (patented)

The **Wrapture™** Harness System provides comfort and stability.

The Backplate is very thin to keep cylinder close to the center of gravity of the diver. It lowers the tank band and places it next to the waistband to keep primary weight on the hips as opposed to the shoulders and it laterally stabilizes the cylinder to keep it from swinging. The Valve Retention Strap pulls top of cylinder in close which shifts the weight downwards while taking stress off the shoulders. Thus the cylinder remains perfectly vertical. Note: Do not

tighten all the way, just enough to keep cylinder vertical. A sheet of LDPE (low density polyethylene) wraps around the diver's body for comfort and stability.

It works in conjunction with the shoulder swivel buckles (patented) and supports the weight pockets. Keeping the back pad pulled in against the back it prevents ride-up. The swivels shoulder buckles allow shoulder strap to swivel backwards so that it can run under the diver's arm. The strap remains flat against the body and prevents ride-up of the BC.

Easy leveling on the hips

All BCs with i3 technology do have an oral inflator in addition

# i3 Technology

#### Innovative - Intelligent - Intuitive

- The i3 technology is a single touch control for both inflation and deflation.
- Tactile lever is easy to locate because the i3 never moves like a traditional inflator at the end of a floppy hose.
- Intuitive control lever lift up to inflate, pushed down to deflate.
- When the levered is moving down, it opens all of the flat e-valves at once.

# BC size guide & lift capacity

Created for anyone who wants to fully customize their dive gear, the **Omni**is a revolutionary jacket-style BCD designed to fit your specific style and size. Bringing ModLock™ technology popularized by our Rogue & Outlaw BCD's connector system, the **Omni** allows you to choose from 3 universal sizing components: for your back, your shoulders and your waist,

allowing for dozens of size combinations. Continue your customization by choosing from multiple accessory options and 6 color kits. This is the ideal platform to create a personalized BC with perfect fit and your choice of color!

#### **Technical Features**

- Customizable jacket style BCD with the most desired features: zippered pockets, stainless steel D-rings, octo holder & knife attachment point.
- PATENTED SURELOCK II WEIGHT SYSTEM allows you to easily insert the weight pouch and an audible "click" lets you know the weights are secure in the BCD. Once engaged, the weights can be released with a firm pull of the handle.
- Color kits available in 6 options with the following components: back pad, reusable mesh bag, Surelock II weight pockets, octo pocket, console holder, inflator hold down, zipper pulls, and chest strap slider.
- MODLOCK™ connectors allow for interchangeable back, shoulders and waist strap components to create dozens of possible sizes and configurations.

Super-streamlined, durable, and full-featured, the AxiomBCD combines comfort, fit, and performance for your dives. An ADV-style, wrap-around jacket with Aqualung's proprietary GripLock tank band and SureLock II integrated weight system. Plus, its Wrapture harness system distributes weight so well, you can walk upright while out of the water.

#### **Technical Features**

#### WRAPTURE HARNESS SYSTEM

Patented swivel shoulder buckles and ultra-thin back plate provide unsurpassed comfort and prevent the BCD from riding up on the surface. Out of the water, the system allows you to stand up straight by keeping the cylinder close to your center of gravity and transferring the weight to your hips.

#### GRIPLOCK TANK BAND'S

Finger-saver feature and macro presets create an easy and safe solution for securing and detaching your cylinder.

#### PATENTED SURELOCK II WEIGHT SYSTEM

Single-pull weight release with patented SureLock II Mechanical Weight Release System.

#### BLADDER RETRACTION SYSTEM

Pulls in the sides of the bladder during deflation to keep you streamlined and reduce drag.

The Axiom i3 is our most comfortable and easy-to-use BCD yet. It is a feature-rich, ADV style, wrap-around jacket that incorporates the innovative i3 inflation/deflation system. The integrated Wrapture harness system allows you to stand up straight in total comfort while the cylinder remains perfectly vertical and pulled in close. Diving has never been this comfortable.

#### **Technical Features**

- THE I3 CONTROL SYSTEM (patented) provides single touch control for inflation and deflation.
- The low profile flat e-valves (patented) all open simultaneously when the i3 lever is pushed
- · WRAPTURE HARNESS SYSTEM

patented swivel shoulder buckles and ultra-thin back plate provide unsurpassed comfort and prevent the BCD from riding up on the surface. Out of the water, the system allows you to stand up straight by keeping the cylinder close to your center of gravity and transferring the weight to your hips.

#### · GRIPLOCK TANK BAND'S

finger-saver feature and macro presets create an easy and safe solution for securing and detaching your cylinder.

- PATENTED SURELOCK II WEIGHT SYSTEM single-pull weight release with patented SureLock II Mechanical Weight Release
- BLADDER RETRACTION SYSTEM pulls in the sides of the bladder during deflation to keep you streamlined and reduce drag.

Our most luxurious BCD and designed specifically for women, the **Soul i3** comes equipped with our intuitive i3 inflation system. Now you can inflate and deflate your BCD with the simple press of a button to find and maintain perfect buoyancy. In addition to the i3, the Soul comes loaded with a host of other features including our patented Wrapture Harness system that positions your scuba tank in a much more natural and comfortable position.

#### **Technical Features**

- THE I3 CONTROL SYSTEM (patented) provides single touch control for inflation and deflation.
- The low profile flat e-valves (patented) all open simultaneously when the i3 lever is pushed down.
- WRAPTURE HARNESS SYSTEM
  Patented swivel shoulder buckles and ultrathin back plate provide unsurpassed comfort and prevent the BCD from riding up on the surface. Out of the water, the system allows you to stand up straight by keeping the cylinder close to your center of gravity and transferring the weight to your hips.

#### · GRIPLOCK TANK BAND'S

Finger-saver feature and macro presets create an easy and safe solution for securing and detaching your cylinder.

Strong. Sleek. Secure. The Pearl is a wrap-around, jacket-style BCD designed to fit the female diver. With its adjustable waistband and specially curved shoulder straps, you can customize it for a perfect fit. Plus, its lower profile lobes and shorter torso length help it rest comfortably on the hips.

- · HYBRID JACKET ADV-STYLE jacket combined with back inflation unit gives you the best of both worlds: a streamlined profile during your dive and the ability to float comfortably at the surface.
- · PATENTED SURELOCK II WEIGHT SYSTEM Single-pull weight release with patented SureLock II Mechanical Weight Release System
- OCTO POCKETS Two octo-pocket locations for versatility: right lobe and top of front lobe.
- · Gear Up! Multiple pockets, D-rings, and knife attachment points make stowing and accessing gear easy..

Tired of paying excess baggage fees? This ultra-light, weight-integrated, back-inflation BCD is everything you need without extra weight or bulk. Lift it and feel for yourself that even a ML/LG weighs less than 4.75lb/2.2kg with airway and weight pockets included! Can be packed flat or rolled. The perfect BCD for travel.

### **Technical Features**

- Innovative tank support system eliminates the need for a hard pack.
- A valve strap pulls the top of the cylinder in towards the center of gravity transferring the load to the hips and relieving the shoulders.
- PATENTED SURELOCK II WEIGHT SYSTEM ingle-pull weight release with patented SureLock II Mechanical Weight Release System.
- Great packability flat or rolled.

### **Dimension**

SM MD ML LG XL BLACK BC1340110S BC1340110M BC1340110ML BC1340110XL

Our high standards put the **Dimension** far above the standards in back inflation-style BCDs. This BCD incorporates our Wrapture harness system and SureLock II mechanical weight release system, and is made of specially developed ResisteK material to stand up to the most rugged conditions in salt or chlorinated water without fading or abrasion.

### **Technical Features**

- WRAPTURE HARNESS SYSTEM patented swivel shoulder buckles and ultra-thin back plate provide unsurpassed comfort and prevent the BCD from riding up on the surface. Out of the water, the system allows you to stand up straight by keeping the cylinder close to your center of gravity and transferring the weight to your hips.

## Instruments

18

Our philosophy of 'Complex Made Easy' is clearly evident throughout our entire instrument range.

With a new Aqualung dive computer, today's divers have an unlimited wealth of convenient, easy-to-use technology and connectivity at their fingertips.

Our dive instrumentation is simplified, accurate and reliable for safe exploration and new discoveries.

### **Diverlog+ App**

Staying connected and managing your dives has never been simpler! Wireless Bluetooth Smart connectivity lets you wirelessly sync your dive data with the DiverLog+ app on your mobile device (available for iOS and Android). With your DiverLog+ app, you can remotely control all your dive computer settings, view dive log and profile data, add locations, notes and other details from your adventures. After your dive, share your memories, stats, photos, and dive site locations on social media.

- Download dive data directly from any Aqualung Bluetooth enabled dive computer, upload your desired settings direct from a mobile device to Dive Computers, and update firmware to Dive Computers using Bluetooth Smart technology
- Stay connected with the **Diverlog+ app!** Share your dive info, photos, and video links directly to your social media channels and make all your friends jealous of your epic dives
- Record all your dive data effortlessly including, elapsed time, conditions, computer settings, tank types and sizes, location, dive site, dive buddies, and gear used
- Electronic dive log signature function allows buddies and instructors to electronically sign your dive log
- Simple search methods help you easily access all your recorded data. Search by location, dive site, and even which computer you used!
- Easily maintain and access your personal certification and medical information so your important data is on hand at all times
- Keep track of your dive gear with the customizable digital gear bags feature
- Synchronize your data between Diverlog Desktop, Diverlog+ app, and the DiveCloud online dive data backup system, so you can access your dive records anywhere
- Export your dive data in various formats for easy review and documentation
- · Review your dive profile in real time

### The Aqualung Difference

Aqualung controls all **aspects of design**, development and manufacturing of our dive instrumentation. We do this to ensure we have high **quality products** that our divers can rely on. Because of this commitment, you will find this **Aqualung Difference** throughout our product line.

- Our technology ensures that once set, your transmitter is permanently paired to your computer and you will not experience the frustration of a lost pairing underwater
- To ensure accuracy and reliability in our analog collection, Aqualung goes well above the industry standard in utilizing the highest-quality Swissmanufactured Bourdon tubes
- Most of our computers are specifically designed with user-replaceable batteries for your convenience.
- We have a team dedicated to the development of our industry-leading DiverLog and DiverLog+ softwares. This allows a seamless user experience of the Aqualung computers with the available app and software

### Custom Lenses

B

Mirror
This lens reduces reflection and glare, making it ideal for conditions with hight light levels in shallow water or a sandy seabed.

Our latest models offer a choice of custom lenses to enhance your **visual experience underwater**.

Choose your custom lenses based on your most common diving conditions.

Ultra Clear
Compared to standard glass, there is no green tint to be seen. This glass is clear to the edge. It renders colors, textures and shapes with impressive clarity.

Blue HD Mirror

The specific tint
highlights warm colors
underwater, providing improved
contrast and enhance depth
and color perception. The mirror
coating helps to reduce glare.
Use these lenses for bright,
sunny conditions.

Designed and built for rigors of technical diving, this dual-lens mask offers rugged durability and superior strength. Its two-piece shock-resistant frame is assembled with AISI 304 stainless hardware that won't corrode. Features an excellent field of view and dark skirt for eliminating distracting light, which reduces eye fatigue during long dives.

- Shock-Absorbing techno-polymer frame stands up to abuse on the dive deck and in the water
- Folds Flat: The mask skirt and unobtrusive buckles fold flat for easy storage in your BCD or wetsuit pocket, making it ideal for use as a back-up mask
- Cardanic Joint Buckles: The joints between the mask and strap rotate in both vertical and horizontal directions for a customized, pinch-free fit
- Superior Headpiece Fit: The wide headpiece on the Teknika's silicone strap conforms to your head to ensure a comfortable, secure fit
- Natural Skirt Fit: High-grade silicone facial skirt flexes to mold naturally along the contours of your face for a comfortable, leak-free seal

For new and experienced divers, the **Plazma** is the only frameless panoramic diving mask that delivers a perfect fit with excellent comfort from surgical grade premium silicone and enhanced stability zones. The **Plazma**mask delivers a lightweight and compact, low-profile design in fresh, exciting color combinations.

### **Technical Features**

- Frameless Design: Frameless design delivers lower volume, greater flexibility, and a lighter weight. That makes the Plazma great for traveling because you can crumple the skirt right against the faceplate
- Comfortable Fit: Pressure reduction zones are incorporated into the silicone skirt at strategic points to help relieve the pressure of the mask on long dives. This engineered

design utilizes these reinforced zones to improve also skirt stability at traditional weak points

- Ultra clear Lens: Ultra Clear lens for a better visibility
- Perfect Fit: Advanced Fit Technology (AFT) enhances the sealing features of the silicone skirt, improving fit, comfort and feel

The women at Aqualung put their heads together and gathered female divers' input to design an unsurpassed women's mask: a wideangle view in an ultra-compact, low-volume, low-profile package. Enjoy a Comfort Buckle System that's tangle-free and Advanced Fit Technology, minimizing the lines left on your face after a dive.

- Comfort Buckle System: Prevents diver's hair from getting tangled in the buckles
- Low-Volume, Dual-Lens Design:
   This mask is quick and easy to clear, and you'll hardly feel any upward pull.
   Its compact shape reduces drag and improves stability, especially beneficial when diving in strong currents
- Advanced Fit Technology (AFT): Skirt features differently textured bands of silicone to form a superior seal and maximum comfort.
- Cardanic Joint Buckles: The joints between the mask and strap rotate in both vertical and horizontal directions for a customized, pinch-free fit
- Tempered Glass Lenses: For your safety and the mask's longevity, the lenses are made of tempered glass to guard against cracks and shattering, even under pressure and stress. Meets ANSI standards

The **Look** mask is a rugged, classically styled two-lens mask, while the frame and skirt are designed to fit a wide range of facial types. The **Look** skirt has been updated with the Advanced Fit Technology (AFT), which uses bands of textured silicone around the edge of the skirt resulting in a superior seal against the face.

- Double lens, 3 mm tempered glass. New twin buttons seeger release system, it make glass locking rings removal quick, safe and easy
- Cardanic joint buckles (double joint buckles) rotate both up- and-down and in-and-out
- Quick counterposed push button activation is easy to use even when wearing gloves
- Wide headpiece on silicone strap provides stability and comfort
- Weight: 185 gr

The New **Sphera X** is the next generation Sphera, the number one freediving mask by Aqualung. The unique distortion-free lens technology provides a 180 degree wide-angle field of vision and let the user experience a panoramic vision that's pure freedom for the eyes. The mask also features a new silicone skirt, an attractive lightweight frame structure and an easy-to-adjust micro buckle system.It comes in a heavy-duty zippered EVA Case, not only to protect the Plexisol lenses but also to eliminate plastic packaging.

- 180° distortion-free panoramic vision thanks to the exclusive curved Lens Technology
- Advanced Fit Technology (AFT) enhancing the sealing features of the silicone skirt, improving fit, comfort and feet
- Plexisol lenses with special anti-fog and anti-scratch benefits
- An innovatively shaped strap better forms to the diver's head, increasing comfort and provides a more secure fit

 MS5150901LR

A revolutionary mask design that positions the lenses within your ocular orbit (the natural facial recesses of the eyes). This results in significantly improved peripheral vision and an incredibly low internal volume. Plus, patented **Micromask** technology reduces frame bulk for a low profile, reducing drag.

### **Technical Features**

- Patented Micromask
   Technology: The use of a single-piece lens, skirt, and frame allows the lenses to be placed close to the face for vastly improved field of view
- Push-Button Strap Security: Counterposed push-button activation makes strap adjustment fast and holds the strap securely in place once set. Easy to use, even while wearing gloves
- Natural Skirt Fit: High-grade silicone facial skirt flexes to mold naturally along the contours of your face for a comfortable, leak-free seal
- Low-Volume, Dual-Lens
   Design: This mask is quick and easy to clear, and you'll hardly feel any upward pull

### Mistique DS

MS5160998

The Aqualung **Mistique** is hard frame single lens mask that offers an uninterrupted field of vision. Its low volume and has a stylish unique shape. It comes with easy to operate flexible joint buckles and complimented by the 3D strap.

All packaged in a luxury zippered Aqualung branded laminated fabric case. The **Mistique** is available in two lens options: the "Plus" and the "Blue" HD Mirror lens.

- Single lens mask with exceptional field of vision
- · Low Profile makes it easy to clear
- Anti-fog coating to aid for crystal clear viewing
- Buckle to skirt so you can fold the mask flat for storage in BCD or suit
- 3D mask strap to perfectly and comfortably fit the diver's head and keep the strap securely in place

### Purge System

From the twin elliptical silicone purge valves on the Aquilon **Purge** to the single valved solutions on the Zephyr and Zephyr flex you gain an efficient draining snorkel. To give you a safe dry and comfortable breath. All our splash guards feature a purge channel to allow the majority of the water to escape directly.

Purge channel splash quard

### Comfo-Bite™ Mouthpiece

The Patented **Comfo-Bite™** Mouthpiece is constructed of hypoallergenic silicone to reduces fatigue and is also available in a midi version and can be easily replaced.

### **Technical Features**

- At the very heart of the snorkel is our shaped and protected silicone Elliptical Purge Valve: the shape of the valve guarantees sealing as well as ease of purging
- The anatomically-designed mouthpiece made from medical grade silicone reduces jaw fatigue
- The joint between the mouthpiece/valve box and the corrugate is a swiveling sealed connection that rotates for a better fit
- The large snorkel retainer is very easy to use even with thick gloves, thanks to an ergonomically-designed structure
- The D-barrel-shaped tube helps the Zephyr Flex rest more streamlined against the diver's face

# 8

Start your diving journey with Aqualung's technologically advanced full line of fins.

Aqualung's designs emphasize and deliver the comfort, fit and performance you need to be confident and in control of your dive.

# Mid foot pivot technology

Aqualung's Mid-foot pivot patented technology links the blade to the middle of the foot pocket through two pivot points. This allows the foot and toes to keep the natural stable position while keeping a wide range of motion in the blade. The result is more comfort, energy, control and efficiency.

# Wave Rib technology

The elastomer rubber sections of the side ribs work together with the wave-shaped structures, accumulating (loading) the energy of every kick that is released during the kick cycle. The effect is a solid, powerful yet easy kick.

# Strap & bucles system

Our buckles and straps are fitted to the fin using a mushroom fitting, this aids the buckle in both being fully secure while still being able to rotate in all directions no matter what force is applied. The straps used are varied from our Silicone Bungee to stainless steel springs to our made in house polymer straps.

<sup>\*</sup>suited for special boots

We expect you'll increase your skill as you progress in diving. That's why the Phazer fin, with its revolutionary composite wave rib technology, is designed to provide balance and power for any experience level. The Phazer uses a tri-material construction and advanced water channel system to optimize energy with every kick.

- Wave Rib Technology: The revolutionary side ribs are made of elastomeric rubber sections and firmer wave-shaped structures to load and release energy at precise moments during the kick cycle.
- Hydro Power Vent: Water can flow through the blade, along the channel in front of the foot pocket. This enhances efficiency, power, and stability for every diver, from student to pro.
- Improved Hydrodynamics: The soft TPR membrane on the blade channels water for improved hydrodynamics during both the power stroke and recovery portions of the kick cycle.
- Tri-Material Construction: we've optimized every single area of the fin by using materials intentionally: the foot pocket, blade, and side ribs are made with different, specific advanced materials to give you the best performance.

The Storm Max fins have a bungee straps made for all dive conditions. Each size has it's own color coding for easier recognition and each fin has a hole in the paddle for easy transport and storage. Produced using Monprene®, a single material construction, gives both durability and strength. The innovative foot pocket design has the advantage of a full foot fin for comfort with the versatility of an open-heel fin for sizing.

- Open heel fin, made in a single TPV compound Monprene
- Ergonomic foot pocket ensures comfort and prevents fatigue
- Silicone bungee strap equipped for easy on-and-off
- Strong blade aids in efficient power transfer
- Simplified size identification by colorcoding on a blade insert

# Shot Fx (Made in )

	S	M	XL
	UK 3 - 6	UK 6 - 9	UK 9 - 11.5
	EU 35 - 39	EU 40 - 43	EU 44 - 47
WHITE ARTIC	FA166114	FA166115	FA166116
TWILIGHT	FA166111	FA166112	FA166113

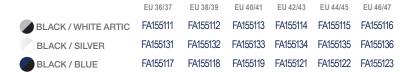

The Shot FX Fins have the Power Zone, located in front of the foot pocket,, the diver a mid-foot pivot point on the fin, minimizing fatigue and maximizing energy transfer to the blade. The foot pockets are specifically sized for women and the blade stiffness increases with size. This offers women divers their choosing of blade stiffness, depending on their style of diving.

#### **Technical Features**

- The foot pocket's design, compounds and sizing are dedicated to women's feet resulting in greater comfort.
- The Shot FX has a dedicated blade that is shorter and softer than traditional fins. This makes them easier to kick
- A spring strap offers a soft heel pad along with Aqua Lung's own proprietary buckles
- The foot pocket is equipped with the
- "Power Transmission Zone" This anchors the foot preventing unnecessary stretching of the foot pocket on the power stroke resulting in maximum energy transmission
- An elastic blade insert creates a "spoon effect" that pushes more water with each down stroke adding to efficiency
- A customized inner sole provides a grip effect. This prevents wasting power from the boot moving laterally inside the boot pocket

Goodbye, surface ... with the efficiency of the Express, you can stay submerged until you forget the rest of the world exists. Its armadillo hinge made of grooved elastic material at the base of the blade absorbs energy during the power stroke and releases it at the end of the kick cycle. You'll go farther with reduced strain on your legs and feet.

- Armadillo Power: Our Armadillo Hinge at the blade base absorbs energy on the downstroke and releases it on the upstroke, giving you a power boost on every kick.
- Full-Pocket Design: High comfort, no booties required. Full-pocket fins give you increased perception of your kicks effect on the water.
- Hydrodynamic: The rubber side ribs channel water down the length of the fin to reduce drag and maximize the efficiency of your kick.
- Reduced Strain: This fin's mid-foot flex joint attaches the blade to the side of the foot pocket to aid in energy transfer and reduce strain on your ankles and toes.

# EXPRESS ADJ (Male)

	S	M	L
	UK 3 - 6	UK 6 - 9	UK 9 - 11.5

Kick it like a pro, even if it's your first dive: the Stratos ADJ is designed for ease, with responsive, dual-material side ribs and blade to help you get the most out of your kick. The blade quickly reaches the optimal angle needed to move water quickly and efficiently. This is a strap-style fin for easy adjustment.

- Ergonomic Straps: Ergonomic straps let you adjust the size for your perfect fit. Easy to operate, even while wearing thick gloves
- Maximum Efficiency: Softer materials hold your foot while a more durable material is precisely placed to prevent the fin from stretching during the crucial power stroke of the kick cycle
- Optimal Positioning: Flexible material between the blade and pocket aids in positioning of the fin for maximum propulsion

The best all-around full-foot fin for warm water. And it's so durable, it passed every anti-shock and stress test we subjected it to! But Stratos 3 doesn't compromise on price or comfort: it's lightweight and affordable. The four-channel structure forces water to flow along the blade for heightened swim performance.

- Torsion Energy Point: We targeted the bending point in this fin and moved it backward to create a more powerful kick with less effort
- Full-Pocket Design: High comfort, no booties required. Full-pocket fins give you increased perception of your kicks effect on
- Stable Fit: Grip on inner sole ensures stability by preventing your feet from sliding around inside the fin
- · A Blade Designed for Power: Made of strong and elastic technopolymers, this blade has a four-channel structure for better hydrodynamics and side wings to enhance swim performance and stability

These fins are lightweight and reactive thanks to a thermoplastic blade construction. The foot pockets use a soft rubber for efficient power transfer with a lateral rips for progressive blade flex.

The Cyclone X Fins add another level of adaptability with the use of a modular system to suit your diving needs. The modular design is also perfect for travelling, allowing the fins to be disassembled and packed into shorter travel bags and reassembled at the destination.

This new tip profile will prevent slipping from side to side while kicking.

# **Blizzard Slim Fit**

Aqualung's best entry-level neoprene drysuit has a fresh new slim design for those divers that like a closer fit. The **Blizzard Slim**Fit drysuit has the same high quality and good looks as the Blizzard – now in a new slim fit option. The drysuit is constructed with compressed 4mm neoprene to limit extra buoyancy and keep its thickness at depth. It is also includes a wide opening cargo pocket with integrated mesh drainage panel for extra storage.

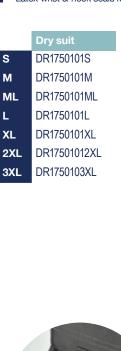

@ADU

The **Alaskan** is our latest design in trilaminate drysuits. It features a telescopic torso and front zipper that allow the diver to equip himself. The neck and wrist seals are produced in latex and boots have reinforced soles for increased durability.

- · Telescoping torso for ease of donning
- Adjustable crotch strap and suspenders secure suit in place
- · Latex wrist & neck seals keep water out
- Spacious pockets with attachment loops
- Durable material overlays in seat and knees for longer life in high-wear areas

# **CeramiQskin**

Our **CeramiQskin** first layer range is the most advanced Aqualung suit ever designed to assist you in staying warm during dives. It can be used under a drysuit or a wetsuit, or it can even be used alone for warm water dives. The material is an exclusive and technical fabric that gives a high level of thermal protection, zero buoyancy and extreme comfort thanks to the Ceramic technology applied in the trilaminated fabric. **CeramiQskin** is a blend of Lycra exterior with a breathable Polyurethane (PU) membrane and polar fleece inside.

- Tri-laminated fabric: Lycra for elasticity on the outside, PU membrance with Ceramic technology in the middle for warm protection, and polar fleece against the skin for warmth and comfort
- · Zero buoyancy
- Ceramic technology based from volcanic rocks, reflects infrared rays generate by the body to keep you warmth
- · Made in France

- Heavy-duty, dual-layered sole with multi-directional traction
  lugs
- Reinforced padded ankle support
- Drainage ports
- · Heel pull tab
- Reinforced toe and hee

# **Wetsuits**

Neoprene wetsuits should complement your dive gear.

Ours offer warmth, comfort and style as you seek out all that scuba diving has to offer.

— Water based Glue

The laminating glue is water-based hence eliminating solvent volatile compounds.

**Dope-Dyed Yarn** 

Dope-dying infuses dye pigments into molten plastic solution to produce colored yarns without dyeing process. This saves tremendous amounts of water while reducing energy consumption and water pollution.

#### **Eco Carbon black**

Carbo black, one of the key ingredients of neoprene, can now be pyrolyzed from scrap rubber tires. This significantly reduces energy consumption and reduces CO2 emission by 200g per wetsuit.

Ultra flexible neoprene

Aqualung has innovated its own superstretch neoprene material called AquaFlex. Used throughout the whole suit, our AquaFlex neoprene has three times the stretch of standard neoprene and is available in our premium wetsuits.

## Rashguards

Our range of rashguards is all for a better protection against UVA and UVB. Thanks to the polyester, they are long lasting in pools and highly chlorine resistant.

### 100% Recycled

The polyester fabric used for our rashguards is 100% sourced from recycled plastic bottles.

# The **eco-friendly alternative** to neoprene

Organiprene is a composite foam made from a mix a natural ingredients from Yulex and recycled materials. This foam is neoprene free, 85% bio based. The rubber from Yulex is ultra pure natural rubber, non sensitizing and sustainably sourced. It is laminated with recycled fabric from plastic bottles.

# 100% Recycled Polyster

The polyester used on our rashguards is 100% sourced from recycled bottles as well as fabrics used as linings on our diving suits.

# **Iceland**

The dive instructor's favorite semi-dry suit, the **Iceland** gets a fresh new look in 2022. Same technology, new colors. Aqualung's most advanced semi-dry suit, with dry zipper, flexibility and eco-conscious materials. The superfit seals significantly reduce water entry at the neck, wrists and ankles. The inner material is soft to the touch, while the outer material is abrasion-resistant and the 7mm super stretch neoprene provides a new level of warmth. The **Iceland** features multi-panel neoprene design and pre-bent anatomic arms and legs with improved Supratex kneepads that ensure an exceptional fit with excellent range of motion. A large cargo pocket or easy storage and a hook to hang your hood complete the features.

- Super stretch 7mm neoprene (petroleum free) for maximum comfort and freedoom of movement
- Durable TIZIP Dry zipper to limit water entrance
- · Cargo pocket for maximum storage
- Liquid fusion seam technology and wrist and ankle cuff seals to limit water entrance
- · Removeable hood included
- Abrasion resistant Supratex shoulder and knee prints
- · Neoprene collar

With the Xscape wetsuits our aim was to design the ultimate eco-friendly wetsuit. These wetsuits use revolutionary Yulex® instead of neoprene, a composite material made of a natural rubber core layer, laminated with water-based glue and a fabric made of recycled plastic bottles. The **Xscape** wetsuits offer enhanced comfort for warm waters between 20 and 28°C (68°F - 82°F). Thanks to the flexible and lightweight material, these 4/3mm wetsuits can also be used for snorkeling, freediving, paddling or any other ocean sport you love.

- Yulex eco-friendly & neoprene-free composite material: 85% natural rubber & 15% polymer foam. Laminated with solvant
- · Warm inner liner made of recycled plastic
- Powertex kneepads for high abrasion resistance combined with excellent
- · All the seams inside are sealed to stop them from bursting making them long-lasting and unbelievably comfortable
- · includes reusable mesh bag

# Wave modular system

Our iconic Dive collection is becoming **Wave** in 2022. New name and new color but same functionalities and benefits. The Wave modular wetsuit system provides versatile options that are durable and comfortable. The modular system addresses wetsuit needs for a variety of water temperatures—from 13° to 25°C (55°F -77°F). For colder waters, there is an add-on step-in jacket and an optional hood or the 6mm jumpsuit with hood attached and front zipper. For warmer water, the reversible shorty offers the right solution. Thanks to the high-density neoprene, the size markings inside and outside (one color per size), and the white personal identification field to write the number of the suit along the zipper, the Wave collection provides the perfect solution for intensive use.

# Wave 6mm

- 6mm high density neoprene (petroleum free)
- Durable thanks to the double-glued, two-thread blind-stitched seams
- All seam junctions are sealed by a small patch to offer superior warmth, comfort and durability
- Ring seals on arms and legs stop water entry
- Ankle zipper on the model with ergonomical hood attached and front zipper
- · Supratex knee panel for more durability

# **Titanium** Shorty

The shorty **Titanium** is designed to be the perfect under garment to be worn under a semi dry suit or a dry suit when water temperature is about 13° to 17°. Thanks to the super stretch 1mm neoprene, it's very comfortable. And the **Titanium** glideskin finishing on the inside will increase the thermal protection. All panels are assembled with flatlock stitching for comfort. V-shaped collar for ease of moment and comfort.

# **Technical Features**

- 1mm neoprene (petroleum free)
- · Inside lined with titanium glideskin
- · Used under wet or dry suit
- Unisex

# **SkinSuit**

Our titanium-lined **SkinSuit** provides warmth, comfort and is easy to take on and off. The **SkinSuit**is designed to wear alone for sun protection and warm-water diving or to wear under a wet or semi-dry suit. Its 0.5mm titanium coating reflects body heat for warmth and comfort and the applied flexible abrasion protection at the knees and shoulders help extend the suit's life. The ankle and foot loops help with donning and doffing.

- 0,5mm high quality neoprene (petroleum free)
- Flatlock stitching offers additional comfort against the skin
- Inside lined with aluminium glidskin
- Loop at wrist and ankle to keep the suit in place when donning a semi-dry or dry suit.

# **CeramiQskin**

Our CeramiQskin first layer range is the most advanced Aqualung suit ever designed to assist you in staying warm during dives. It can be used under a drysuit or a wetsuit, or it can even be used alone for warm water dives. The material is an exclusive and technical fabric that gives a high level of thermal protection, zero buoyancy and extreme comfort thanks to the Ceramic technology applied in the trilaminated fabric. CeramiQskin is a blend of Lycra exterior with a breathable Polyurethane (PU) membrane and polar fleece inside.

- Tri-laminated fabric: Lycra for elasticity on the outside, PU membrance with Ceramic technology in the middle for warm protection, and polar fleece against the skin for warmth and comfort
- · Zero buoyancy
- Ceramic technology based from volcanic rocks, reflects infrared rays generate by the body to keep you warmth
- · Made in France

# Men's Rashguard Slim Fit

The name **Rashguard** reflects the fact that the shirt protects against rashes caused by abrasion or by sunburn from extended exposure to the sun. But the latest trendy Aqualung rashguards can do a lot more that that; they are designed to be worn both in and out of the water while providing sun protection, ward off jellyfish stings or add an extra layer under your Aqualung dive suit. The range offers close-fitting or loose-fit cuts to suit different needs and styles, and leggings for women.

- · Made with recycled plastic bottles
- 80% polyester / 20% Elastane for elasticity
- · Slim Fit
- · Provides protection against the sun

# Junior & Kid's Rashguard

The name **Rashguard** reflects the fact that the shirt protects against rashes caused by abrasion or by sunburn from extended exposure to the sun. But the latest trendy Aqualung rashguards can do a lot more that that; they are designed to be worn both in and out of the water while providing UV protection, ward off jellyfish stings or add an extra layer under your Aqualung dive suit.

- 80% polyester and 20% elastane
- Slim fit
- Provides protection against the sun

Manta Boots feature a raised heel, built-in arch, and a patented two-seam pattern for added comfort. Arch support ensures that your foot and ankle are stabilized. Manta Boots come equipped with a heavy-duty zipper for easy donning and doffing. Seams are glued and sewn to maximize boot strength and durability.

# **Technical Features**

- 5mm neoprene thickness
- · Comfortable as a sneaker shoe: compressionmolded sole build in arch support, and raised heel
- Slip-resistant
- Durable thanks to the heavy-duty fabrics and non-corrosive zipper

# **SuperLow**

The ideal warm water dive boot, SuperLow Boots are made from as few seams as possible, strategically placed away from the foot's widest areas to decrease chafing. Less seams doesn't mean less protection, as these boots are designed to prevent excess water retention and come with a treaded sole that keeps your feet from getting punctured or stung in and out of the water.

# **Technical Features**

- 3mm neoprene
- Maximum comfort thanks to I50 the Ergo shaped footbed and outsole to match the profile of the foot
- · Non corrosive YKK zippers
- · Thick treaded sole to protect the feet and specific pattern for slip-resistance

BS1450140XS BS1450140S BS1450140M BS1450140L BS1450140XL

Protect your feet in all conditions with socks. We've designed this one to be worn comfortably with a wetsuit or drysuit: it adds a layer of warmth in cold waters and prevents blisters while wearing open-heel fins. Booties also protect your feet from scrapes and stings when wading in and out of the water during shore dives.

- 3mm neoprene available in high and low profile
- Silicone print on the sole for grip
- Glued and blind-stitched seams prevent water entering

# **AquaFlex** Hooded

Increase the range of your dive travels economically: add warmth to any other wetsuit or drysuit by layering this hooded vest underneath. The varying degrees of neoprene thickness in the vest will provide targeted insulation in high heat-loss areas while ensuring the vest can still be taken on and off easily.

#### **Technical Features**

- Ultra-stretch neoprene: 6mm on the hoof, 5mm on the front and back, 4mm of the face seal and 3mm on the sides
- · Bubble vent in the hood

# **AquaFlex**

8 10 12 14 Black / White SU80301094 SU80301096 SU80301098 SU803010910 SU803010912 SU803010914 2mm - Men S M ML XL 2XL 3XL Black / White SU8030109S SU8030109M SU8030109ML SU8030109L SU8030109XL SU80301092XL SU80301093XL 2mm - Women

Make your dive wardrobe more versatile: add warmth to any other wetsuit or drysuit by layering this thin vest underneath. The varying degrees of neoprene thickness in the vest will provide targeted insulation in high heat-loss areas while ensuring the vest can still be taken on and off easily.

- 2mm Ultra-stretch neoprene for warmth and full range of motion
- · Long lasting seams are glued and blind stitched

## **Hooded** UnderVest

Black - Men NE1230101S NE1230101M NE1230101L NE1230101XL NE1230101XXL

Black - Women NE1240101XS NE1240101S NE1240101M NE1240101L NE1240101XL

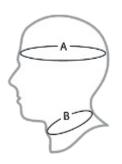

With an ergonomic shape and integrated aluminum coating, the hooded undervest is the most advanced undersuit available from Aqualung. The aluminum coating acts like a shield and reflects your own body heat back to you, keeping you warm during cold water dives. Enjoy a perfect collar seal, created when the glide skin seals with the internal skin of your wetsuit, keeping water exchange to a minimum.

#### **Technical Features**

- 2.5mm superstretch neoprene (petroleum free) with aluminium coating to increase warmth
- · Collar in Glide skin for perfect sealing
- Face seal to limit water entrance and bubble vents to remove trapped bubbles

TURQUOISE BA1754301

Need a bag to store your gear between dive trips? Tired of wheeling your fancy travel luggage full of dive gear to the beach? Have an unorganized rental locker? The Aqualung **Adventurer** Mesh Bag is the perfect solution. Whether it's used to differentiate kit sizes in a dive locker, brought on a trip to leave your luggage in the hotel or just to keep your gear packed neatly away, the **Adventurer** Mesh Bag is up to the task.

- Soft Polyester mesh body folds down to the size of a sweatshirt for easy packing and travel
- Mesh body allows to rinse your whole kit and let it dry while on the go
- · Corrosion resistant zippers
- Removable padded shoulder strap
- Size: 34 x 76cm
- · Weight 0,6kg (1,25livre)
- · Volume: 70L

# **Explorer II** Collaps

**BLACK** BA1790101

The Aqualung **Explorer II** Collapsible Mesh Duffel is your biggest friend and smallest ally for your next dive trip. The duffel portion zips into a pocket on the back of the regulator compartment, allowing you to bring your heavy regulators and delicate dive computer on the plane as a personal item. This will help you avoid over weight fees, gives you a spare mesh dive bag and doesn't prevent you from also bringing your **Explorer II** Carry-on.

#### **Technical Features**

- Padded regulator compartment
- Mesh duffle is perfect for rinsing and drying the gear
- · Corosion resistant zipper
- Open: 34 x 13" diameter (80 x 35d cm)
- · Closed: 5x13" diameter (2;7x33d cm)
- Volume: 75L

## **Pro Pack One**

BLACK NAVY BLUE BA1800104

The Aqualung **Pro Pack One** features a top-loading design with multiple organization pockets for your gear on dive days or day to day needs for all those other days. The spacious main compartment features a laptop sleeve and the bottom entry compartment is padded for your regulators or mask.

- Padded pocket for regulator or mask
- Multiple storage: laptop pocket, sunglass pocket, water bottle pocket
- · Bottom pocket for additional storage
- Size: 20.5 x 12.5 x 7.5" (52 x 32 x 19cm)
- · Volume: 30L

# **Explorer II** Regulator Bag

BLACK

BA1780101

The Aqualung Explorer II Regulator Bag is the perfect bag for protecting your regulators. The combination of foam and PE padded walls protect your delicate gear while the round shape minimizes hose kinks. The compact design packs flat and pairs with all the bags in the Explorer II Collection.

#### **Technical Features**

- Corosion resistant zipper
- Protective padding
- Size: 13 x 12 x 4" (33 x 30 x 10cm)

# **Defense** Duffel Bag

BA117111

This rugged, pit bull of a duffel, has waterproof seams to keep your favorite gear completely dry on any dive adventure. The bag is designed to carry a full set of dive gear, including your BC. When the dive is over, use the drain on the side of the bag as a rinse bucket and fill the bag with all your wet gear - the water won't leak out.

- 500D Nylon core 0.6mm double coated tarpaulin material and YKK zipper (#10)
- · Heat welded waterproof seams and replaceable side drain valves
- Size: 26 x 16" diameter (66 x 40.5cm) 85Liters

# The Classic bag

YELLOW

BA111132

**The Classic Bag** offers good proportions to carry your dive equipment, including one external pocket for the fins and another external zip pocket to keep your personal items safe and dry.

#### **Technical Features**

- PVC coated 1200 Decitex Nylon
- External fins pocket
- Size: 78 x 40 x 35cm 100 Liters

# **Travel dry Bag**

BA11131

Perfect durable waterproof bag to carry wet equipment.

- Bag made with Tarpolin
- 2 screwed Valves
- Size: 85 x 35 x 45cm 130 Liters
